CHAPTER -2:
EOI OBJECTIVE AND SCOPE OF WORK

रेलटेल
RAILTEL

A Navratna CPSE
Govt of India

2.1 PROJECT BACKGROUND AND OBJECTIVE OF EOI

Indian Railways, the backbone of India's mobility and infrastructure, is accelerating modernization through indigenous, technology-driven solutions under Atmanirbhar Bharat and the national vision for Digital Railways under PM Gati Shakti National Master Plan (PMGS-NMP). At the forefront is Kavach, an Automatic Train Protection (ATP) system developed in India to strengthen railway safety, prevent collisions, and ensure operational excellence.

Indian Railways requires a robust, intelligent, and standardized digital platform capable of automating the generation, verification, and validation of Kavach design documents. The proposed solution should leverage Artificial Intelligence, Machine Learning, and advanced automation to generate designs accurate, validated, and RDSO-compliant designs.

The system must streamline traditional manual engineering tasks, increase accuracy, strengthen auditability, and accelerate the rollout of Kavach across zones through a unified design management and validation ecosystem.

RailTel invites EOIs from RailTel's Empanelled Partners for optimized solution and price discovery. The best offered solution for Kavach design document generation and validation system will be selected and can be hosted in RailTel's State of art Data Centre at the discretion of RailTel. RailTel may use the offered Solution to complement/bundle/co-brand/re-brand the Services to its end Customer or for internal use of RailTel.

2.2 SCOPE OF WORK:

Problem Statement

Indian Railways is undertaking a major modernization initiative to strengthen operational safety and accelerate the deployment of Kavach, the Automatic Train Protection (ATP) system. A critical requirement for this nationwide rollout is the accurate preparation, review, and approval of various signaling, track, and safety-related design documents such as TIN Layout, RFID tag Layout, Kavach Tables of Control (TOC), Track Profile data and RFID tag data. These output documents are prepared by analyzing Signaling interlocking plans (SIP), Signal TOC, Gradient plans and Survey data from Drone surveys.

At present, these documents are prepared, analyzed, interpreted, and validated manually by engineering teams across different zones. This manual process is highly time-consuming and depends extensively on individual expertise and human interpretation. Given the complexity of railway signaling systems and the volume of data involved, manual reviews are time consuming and prone to oversight and inconsistencies, especially where cross-verification between multiple documents is required.

Furthermore, many of the input documents exist in heterogeneous formats—PDFs, scanned drawings, DWGs, spreadsheets, and long-form text—making it difficult to maintain uniformity, traceability, or a standardized validation approach. The lack of an integrated digital workflow often leads to prolonged review cycles, repeated back-and-forth communication, and difficulties in maintaining audit readiness. Minor discrepancies in asset locations, signal IDs, TIN definitions, or RFID tag placement can result in significant safety risks, forcing rework and delays.

As the scale of Kavach deployment expands across the national railway network, the current manual processes hamper the needed pace for nationwide rollout. There is a clear need for a fully digital, AI-enabled platform that can extract structured data from diverse engineering documents, generate standardized design outputs, perform automated multi-layered

validations, highlight discrepancies visually, and facilitate collaborative review and approval workflows.

Solution Scope

The Scope of Work consists of three major functional components:

1. AI-powered Input Data Ingestion
2. Unified Digital Repository for Input Data
3. Automated Design Document Generation

1. AI-POWERED INPUT DATA INGESTION

The platform should provide a secure, role-controlled interface for uploading and managing various input documents.

- 1.1. Ingestion of Railway Signalling & Infrastructure Documents
- 1.2. AI/ML-Based Extraction
 - 1.2.1 Signal Interlocking Plan (SIP) Extraction
 - 1.2.2 TOC Extraction
 - 1.2.3 Gradient & Survey Data Extraction

2. UNIFIED DIGITAL REPOSITORY FOR INPUT DATA

- 2.1. A digital repository of SIP, TOC, and Gradient Plan for all the required stations.

3. AUTOMATED DESIGN DOCUMENT GENERATION

With the uploaded data, the solution should employ an AI/ML extraction engine to read, interpret, and convert unstructured engineering drawings and PDF documents into machine-readable structured datasets.

3.1. Automated Design Document Generation:

- 3.1.1. Automated Track Identification Number Assignment
- 3.1.2. Automated RFID Tag Placement
- 3.1.3. Generating RFID Tag Layout
- 3.1.4. Creating Table of Control
- 3.1.5. Producing Track Profile Table
- 3.1.6. Compiling RFID Tag Data
- 3.1.7. Automated generation of SIP from Engineering Scale Plan (ESP) and TOC from SIP and other minor documents like gradient information generation, OHE mast layout generation, roll diagram generation, EIG sanction document generation and CRS/CSTE sanction document generation (wherever applicable)
- 3.1.8. Generation of Kavach QC Report and Collaboration for externally designed kavach documents (wherever applicable)
- 3.1.9. Factory Acceptance Test (FAT) for electronic interlocking stations as per approved SIP and TOC

3.2. Interactive Editing & Collaboration

- 3.2.1. Editing Tools for Railway Personnel
- 3.2.2. Collaborative Features
- 3.2.3. Approval Workflow

4. Change Management: Bidder should support in incorporating any feedback given by Railways in modifying the designs of Kavach design documents already generated.

5.Helpdesk support for 5 years from completion of design documentation work is part of the scope of the work and costing of the same shall be included in Offer.

The partner shall not transfer its rights and obligations under this agreement to any other party. In case of a merger or amalgamation of partner or RailTel with any other entity, the rights and obligations under this agreement will stand transferred to the merged entity.
