- V. Reporting on Agent's efficiency :
 - a. Login, Logout, Breaks, Activity duration
 - b. Calls answered (wrt number of calls), Calls abandoned (in queue/while ringing)
 - c. Average conversation time
 - d. Response time to answer the call (ringing time to answer timing)
 - e. Forced out-calling of missed/abandoned calls
- VI. Centralized Contact Center system for distributed Help Desks for RCIL NOC and RailWire MSPs
- VII. Toll Free numbers to be mapped on PRI for inbound calls which can be routed to respective NOCs & RailWire MSPs based on defined IVR branching.

- VIII.** Out-calling bridge for information dissemination to internal stakeholders and concerned territories, to improve response time in case of critical/mass outages.
- IX.** The Contact center application will have lookup table/CTI integration to present details of the caller to the help desk agent.
- X.** The calls will be transferable from one user to another user (e.g. Help Desk Agent to L1/L2).
- XI.** The solution will have feature of connecting the customer call to the Soft Client based phone, existing IP phones (VOIP) or Agent's mobile phone (call routing has to be done based on regulatory compliances).
- XII.** Application will have the capability of making IVR based auto-dialing outbound calls, for running campaigns and record responses e.g. running C-SAT campaign.
- XIII.** System will be capable of maintaining Call logs, Call details and Call recordings etc. in the real time for analyzing the quality.
- XIV.** The Solution will have the capability in terms of scaling up the required resources within the stipulated time frame.
- XV.** IVR Platform will support to multiple languages (other than English, message needs to be recoded).
- XVI.** The solution shall have functionality of sending customized voice messages to the customer.
- XVII.** It will provide built-in agent desktop capabilities that allow agents to perform call-control functions directly from their desktops.
- XVIII.** Agents can route calls, connect them to a conference with SME/TAC2 or transfer
- XIX.** It will allow supervisors/managers to view agent states and call information, send text- chat messages to agents, interrupt or intercept calls, record conversations, and silently monitor agent calls.
- XX.** The solution will provide real-time and historical data necessary for mission-critical contact center reporting.
- XXI.** The reporting function provides accurate and timely reports on contact center activity, helping managers make informed decisions regarding staffing levels, contact handling procedures, and technology investments.
- XXII.** The solution shall have feature of maintaining data and report of no. of calls received/missed/attended/callback and average hold time of calls. This data should be available on daily/weekly/monthly basis.
